INO BIO - trademark of RUVERA UAB

RUVERA is a reliable and flexible organization that brings your project with the best quality at the right time in a profitable way.

- Almost 30 years of experience (Est. 1994)
- 15 years in pharma manufacturing sector
- EU GMP certified cleanroom facilities
- Customizable manufacturing options
- Experience in 30 countries
- Specialized in small and medium batches
- Quality standards ISO 9001, ISO 14001
- Flexible production capabilities
- Analytical testing and R&D lab in site
- According to manufacturing standards ISO 13485, ISO 22716

RUVERA

SPECIALISTS IN NON-STERILE SEMI-SOLID AND LIQUID PRODUCTION

Almost 30 years, RUVERA has been an expert in the manufacturing, packaging and selling of semi-solid and liquid products such as pharmaceuticals, medical devices, disinfectants, biocides, veterinary medicinal products, supplements and cosmetics.

In the year 2018 Ruvera has established new facility (2500 m²), designed for pharmaceutical production, equipped for flexible, customizable scale manufacturing. It produces for sale in Europe, Middle East, Far East and Africa - for 30 countries.

In Ruvera manufacturing unit there is a wide variety of mixing vessels and tanks, ranging from 15 liters pilot scale to 1000 liters commercial scale, which supports a variety of product types, viscosities and processes. The packaging capabilities include aluminum, laminate and plastic tubes, plastic and glass bottles, as well as jars (including metered dose pumps), canisters and drums. The contract manufacturing process includes bulk manufacturing, filling, quality control and release.

QUALITY

More than fifteen years of medicine manufacturing experience allows company to reliably and qualitatively produce non-sterile semi-solid and liquid products. The quality system fulfills the EU GMP (Good Manufacturing Practices) requirements as well as the ISO 13485 standard for Medical Devices and ISO 22716 for Cosmetics.

The quality management system of UAB Ruvera is certified according to the requirements of the ISO 9001 standard; the environmental protection management system is certified according to the requirements of the ISO 14001 standard.

A quality management system, continuously checked and improved, is the main factor to high products quality. All processes at RUVERA, from selection of the raw materials to any production flow and packaging are subject to proper quality control.

CALCIL MAG + ORGANIC

Liquid calcium (44.0 g/dose) supplement – oral gel with magnesium (3.9g/dose) for preventing milk fever

- contains organic and inorganic calcium salts, has neutral pH, therefore, less irritates mucous membrane
- Recommended as a supplement to help to prevent sub-clinical calcium deficiencies
- Contains energy source propylene glycol
- Contains calcium propionate, calcium acetate, calcium chloride, magnesium chloride, propylene glycol and methionine

CALCIL MAG EXTRA ORGANIC

Liquid calcium (46.4g/dose) supplement – oral gel with magnesium (1.1 g/dose) for preventing milk fever

- Contains only organic calcium salts (does not contain calcium chloride), has neutral pH, therefore, does not irritate mucous membrane
- Recommended as a supplement to help to prevent sub-clinical calcium deficiencies
- Contains energy source calcium propionate
- Contains calcium propionate, calcium acetate, magnesium chloride, sodium chloride, choline chloride, niacin

CALCIL MAG

Liquid calcium (49.9g/dose) supplement – oral gel with magnesium (3.5 g/dose) for preventing milk fever

- Fast absorption of calcium
- Recommended as a supplement to help to prevent sub-clinical calcium deficiencies
- Contains calcium chloride, magnesium chloride, potassium chloride

CALCIFOSTIL

Liquid calcium (26.4g/dose) supplement – oral gel with magnesium (2.9 g/dose) and phosphorus (3.8g/dose) for preventing milk fever

- Clinically proven optimal proportion of calcium and phosphorus (7:1)
- Recommended as a supplement to help to prevent sub-clinical calcium and phosphorus deficiencies
- Provides quickly absorbed calcium
- Contains calcium chloride, magnesium chloride, sodium dihydrophosphate, potassium chloride

COMPLEMENTARY FEED

CALCIL PHOS

To reduce the risk of paresis and subclinical hypocalcaemia:

- 58g of calcium and 45g of phosphorus in a dose of inorganic salts
- Does not irritate the mucous membranes - without calcium chloride
- It is recommended to feed with the feed or to give the product individually
- Fast absorption of calcium and phosphorus
- Contains dicalcium phosphate, disodium phosphate and glycerol

ENERGY PROFILE

Complementary feed – oral gel for reduction of the risk of ketosis or to use for ketosis recuperation

- Reduces ketone bodies in the blood
- Helps to prevent a negative energy balance
- Reduces the risk of ketosis
- Increases the consumption of dry matter
- Improves feed uptake
- Protects from sudden weight loss
- Reduces the risk of pre-eclampsia
- Increases the glucose level in the blood
- Increases milk yields

DIARAL PASTE

Complementary feed for calves (20 ml disposable syringes)

- Restores water and electrolyte balance
- Stabilises and improves digestion
- Absorbs and removes toxins from the digestive tract
- Effective aid in the fight against Escherichia coli, Salmonella and Clostridium genus microorganisms
- Acts as prebiotic
- Strengthens the immune system

PROFICARB Gel with activated charcoal (30%)

Complementary feed for indigestion (diarrhea), prevention of toxemia

- At the first sign of indigestion or diarrhea
- Intestinal inflammation
- Stabilizes and improves digestion
- Absorbs and removes toxins from the gastrointestinal tract
- Regulates intestinal peristalsis
- Has detoxifying, anti-inflammatory antibacterial and antidiarrheal effects

PROFI PULMO Healthy breathing

Complementary feed for coughing ruminants and horses with the recurrent respiratory problems. Offers relief at cold and cough and also eases irritated respiratory tract, strengthens the body during colds and inflammations

- Recurrent respiratory problems
- A chronic cough
- During a cold

PROFI RUMEN Activator of Rumen

Complementary feed for ruminants with the impaired rumen function (rumen atony). It stimulates rumen and intestinal activity and stabilizes the good microflora in the digestive tract

- Rumen atony
- Disturbance of normal intestinal cramps
- Supporting colonization of positive bacterial flora
- Restoring proper metabolism

PROFI IMMUNO Probiotic-vitamin complex

Complementary feed for newborn calves, in the period of increased stress and/or after antibiotic therapy

- After antibiotic treatment to replenish and rebuild the bacterial flora
- Colonization of beneficial intestinal microflora in the digestive tract
- Stimulation of the breast milk metabolism
- Disorders of collection, digestion and absorption of fodder
- Stimulation of the body overall immunity
- Supportive in the case of diarrhea

PROFI VITA Vitamin complex

Complementary feed for horses, camels, cattle and other ruminants. The complex of vitamins, amino acids and minerals is especially suitable in case of deficiency of these substances or in the period of growth, development, increased stress

- Ensuring the proper growth and development of young animals
- During periods of increased effort and stress
- Weakness and deficiencies of basic amino acids, vitamins and minerals

COMPLEMENTARY FEED

HEPATAVIS

A concentrated oral complementary feed is intended for highly productive animals or as a preventive measure in the cases of food poisoning, mycotoxicoses, fatty liver syndrome, infectious diseases and digestion disorders.

- Increases appetite
- Improves growth
- Causes hunger in birds
- Enhances digestibility
- Protects from the functional disorders of the body caused by mycotoxins
- Improves fatty acid oxidation process
- Enhances the liver and kidney function

CALCIMIX D₃ PLUS

Concentrated liquid complementary feed for increasing calcium and vitamin D₃ (cholecalciferol) levels

- Laying hens - for improved eggshell strength and enhanced productivity
- Chickens, broilers, turkeys, ducks, geese, pigeons, pheasants and other poultry - for improved strength of bone tissue in the presence of bone tissue deformation
- Bovine animals, sheep, goats - for the prevention of osteoporosis, paresis after parturition and grass tetany
- Pigs - for reducing the risk of rachitis and osteoporosis, ensuring adequate mineralisation of bone tissue and improving fertility
- Calcium - 82,3 g, magnesium - 3,0 g, vitamin D₃ - 2 000 000 TV

GARLIMIX POULTRY

Concentrated liquid complementary feed for improved health and enhanced growth of poultry (chickens, broilers, turkeys, ducks, geese, pigeons, pheasants, etc.)

- Used for enhanced growth and improved immune system
- For prevention of infectious intestinal diseases and parasitosis
- Garlic essential oil, Oregano essential oil, processing aids

METHAMIX POULTRY

Concentrated liquid poultry complementary feed for reducing heat stress (chickens, broilers, turkeys, ducks, geese, pigeons, pheasants, etc.)

- For reduced stress and improved respiration
- For prevention of respiratory diseases
- Mint essential oil, Eucalyptus essential oil, Oregano essential oil, Peppermint essential oil, processing aids

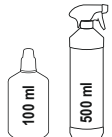

3BIO ACTIVE

Transparent solution - natural repellent with Geranium, Lemongrass and Clove essential oils for control of flying insects

- Effective against flies, mosquitoes, horseflies, gadflies and midges, ticks and fleas
- Used directly on animal
- Contains high-grade biologically active ingredients
- Ready to use solution

HOOF CARE

PROFIHOOF GEL

Topical adhesive gel for individual treatment of hooves with Copper and Zinc chelates, Tea tree essential oil and herbal extracts

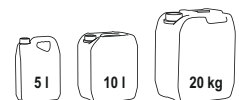

- Excellent after trimming, also when problems in hooves occur
- Binds well with the surface of application, covers evenly despite the presence of blood
- Has disinfecting and bactericidal properties, therefore, effective in cases of infectious inflammation of hooves
- Long-lasting effect promotes healing
- Recommended to use with a brush

PROFIHOOF LIQUID

A concentrated (dilutable) liquid gel for external hoof care, hygiene, and health with copper and zinc minerals in chelated form

- Enriched with Propolis, Calendula, Witch-hazel extracts and Tea tree oil
- Can be used by spraying or for hoof baths
- User friendly
- More effective than zinc or copper sulphates

PROFIHOOF GEL with 38 % Salicylic acid

Hooves care gel with 38 % Salicylic Acid and 10 % Aloe Vera Juice

- Recommended to use for hoof problems, such as digital dermatitis (Mortellaro disease), interdigital skin inflammation, hairy heel warts etc.
- The gel works quickly and effectively (relieves pain, reduces swelling and cleanses)
- Safe in use and easy to dose
- Contains no antibiotics, there is no possibility of antibiotic resistance
- No milk or meat withdrawal period

HORSE AND CAMEL CARE

PROFI HORSE HOOF GEL

Topical adhesive gel for individual hoof treatment

- For preventative hoof care when keeping on wet ground
- For treatment of disorders such as thrush and hoof cancer
- Reduces the risk of bacterial and fungal development
- Protects the sole against putrescent processes
- Increases the hardness of the horn while protecting against dryness
- Binds well with the surface of application, covers evenly despite the presence of blood
- Impregnates, hardens hooves
- Has a prolonged effect
- Retains its intensity even upon contact with manure or dirt
- Does not contain antibiotics, therefore, there is no risk of the microorganisms developing resistance

MSM POWDER

Maintains healthy activity of joints

- Helps to maintain general flexibility and mitigates pains and discomfort related to everyday exercise
- MSM contains 34% of biologically available sulphur; therefore, it is the richest source of organic sulphur
- Sulphur is needed for the synthesis of collagen and glucosamine – the most important components of healthy bones, joints, ligaments and tendons
- **Ingredients:** Methylsulfonylmethane – 99.90% (amount of sulphur – 34%)

ELECTROLYTE POWDER

Complementary feed for horses developed to prevent consequences of an excessively low level of electrolytes such as: dehydration, fatigue, lowered immunity

- Prevents dehydration and condition caused by electrolyte deficiency
- Improves regeneration process after physical exertion
- Helps in case of decreased immunity
- Administered directly to feed or dissolved in warm drinking water

HORSE AND CAMEL CARE

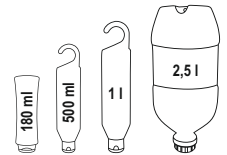

PROFI Horse Relax liniment

Relax liniment - relaxing dual action gel with an initial cooling effect followed by a heating sensation

- Provides an initial freezing and cooling effect followed by a heating sensation
- Reduces muscle stress and pain after physical exertion
- Alleviates neuralgic pain
- Relieves pain and swelling after injury
- Reduces the sensation of heavy legs

Composition: Menthol, Methyl Salicylate, base ingredients

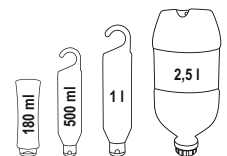

PROFI Horse Ice liniment

Ice liniment gel is used for emergency treatment of injuries

- The gel quickly and effectively alleviates acute pain and inflammation
- Is used after intensive physical activity or as a daily care product for horse legs and muscles
- Analgesic and cooling effect – efficient treatment immediately after injury
- Swelling and muscle spasm relief
- Reduction of inflammation

Composition: Menthol, base ingredients

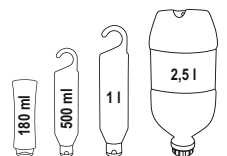

PROFI Horse Arnica liniment

Arnica liniment is a product used to prevent injury and pain in horses due to racing and training

- Protection against possible injury and pain
- Prevention of fluid accumulation
- Reduction of cramps and improvement of muscle activity
- Efficient injury relief treatment

Composition: Arnica Montana Flower Extract, Hamamelis Virginiana Extract, base ingredients

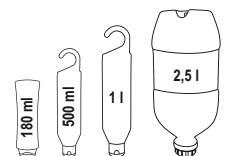

PROFI Horse MSM liniment

A dual action MSM liniment

- Recommended for use as a supplementary care product in the presence of various chronic inflammations and pain
- Provides initial freezing and cooling effect followed by a warm sensation
- Reduces swelling
- Relieves chronic pain and inflammation
- Improves blood circulation in the damaged tissue
- Helps repair joint structure compromised by osteoarthritis
- Prevents muscle spasms
- Promotes joint mobility

Composition: Methylsulfonylmethane (MSM), Menthol, Camphor, Eucalyptus Globulus Leaf Oil, Mentha Piperita Oil

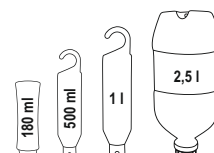

GREEN PLUS ARNICA

Topical green liniment with balanced composition of Menthol, Eucalyptus and Arnica for horse muscle & joint care

- Excellent for post exercise horse leg care
- Antiseptic effect - helps with small cuts or abrasions
- Dual cooling and warming effect
- Pain soothing effect
- Recommended in cases of arthritis, bursitis, muscular, ligament and tendon strains and inflammations
- Easy application and no preservatives

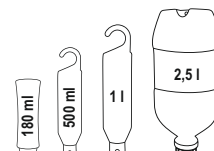

MENTHA 1 PREMIUM

Premium product for racing camels and horses

- 36% pure Japanese peppermint oil
- Makes muscles sleek, joints flexible and body going nicely
- Helps to avoid cramps and brings the tissues in an optimized after-race condition
- Recommended in cases of cramps, lameness or pain and muscle shiver

Composition: Mentha Arvensis Leaf Oil, base ingredients

LEATHER CARE BALM with beeswax and avocado oil

Balm for care after all types of smooth leather products (horse saddles, shoes, leather belts and clothes etc.)

- Cleans, nourishes, moisturizes leather and its products
- Protects leather from losing color and becoming dry
- Restores and preserves the natural qualities of leather
- Color-neutral and suitable for all types of smooth leather
- Prolongs the lifetime of leather products

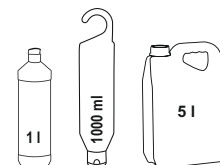

HORSE AND CAMEL CARE

IODINE SHAMPOO

Intended for regular use to help control common bacterial and fungal skin infections

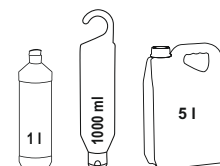

- Iodine based shampoo for horses and dogs
- Has antiseptic properties against bacteria and fungi
- Quickly and easily removes dirt from fur
- Relieves itching
- Neutralizes unpleasant smell

MEDICATED SHAMPOO

Intended for irritated and flaky horse and dog skin with Ichthyol, Salicylic acid, Rosemary essential oil and Horse chestnut extract

- Contains a gentle anti-bacterial agent and conditioner to cleanse and condition the horse's and dog's skin
- Quickly and easily removes dirt from fur
- Removes scars and relieves itching
- Ideal for regular use

CITRONELLA SHAMPOO

Intended for effective protection of horses and dogs skin and fur with Clove, Eucalyptus and Neem tree essential oils and Calendula extract

- Effective protection from external parasites
- Quickly and easily removes dirt from fur
- Naturally shining and easy combed out coat
- Neutralizes unpleasant smell
- Soothes the irritated skin and tonifies it
- Without synthetic colorants

DMSO gel

Dimethyl Sulfoxide (DMSO) gel for external use for horses and dogs

- Pure DMSO in gel form
- Used topically on the skin
- Penetrates quickly into the skin, acts as an anti-inflammatory agent
- Reduces joints (osteoarthritis) pain and swelling
- Reduces inflammation in areas where injuries have occurred
- Intended for treatment of tendon and ligament injuries

ICHTHYOL 20% PLUS ointment

Topical skin ointment with 20% Ichthammol, Lanolin and Salicylic acid for phlegmons, abscesses, purulent inflammations and other dermal diseases treatment

- May be used in cases of damaged nails and epidermis around nails
- Effective in case of acute mastitis in udder
- Reduces itching and stimulates skin regeneration

ICHTHYOL - CAMPHOR ointment

Topical skin ointment with 15% Ichthammol and 10% Camphor, Lanolin and Salicylic acid for abscesses, phlegmons, purulent inflammations and other dermal diseases treatment

- Provides anti-inflammatory, pain soothing and anesthetic effect
- Multipurpose: excellent in case of udder mastitis and edemas
- Stimulates tissue regeneration

IODIDERM with Chamomile extract

Topical skin ointment with Iodine, Salicylic and Lactic acids and Chamomile extract for warts and Cowpox, Horse pox, Dog pox, Cat pox (Varicella) treatment

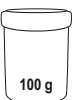

- Acts as disinfectant, effective against microorganisms and microscopic fungi
- Soothes irritated skin, reduces itching, enhances regeneration of skin cells
- Softens skin

ZINC ointment

Topical skin ointment with 15% Zinc oxide and Lavender essential oil for damaged skin

- Used as an additional skin care preparation for eczema, chapped skin, skin inflammation and intertrigo
- Normalizes physiological skin functions
- Reduces inflammation

SPORISIL

Topical skin cream with Clove essential oil and Cetrimide for various fungal skin infections

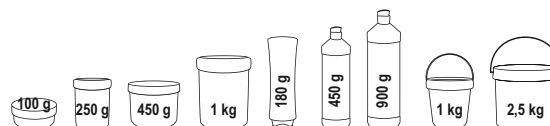

- Antifungal effect
- Has excellent antiseptic and disinfecting characteristics and bactericidal effect
- In case of skin infection caused by dermatophytes
- Warms the skin and acts as repellent

ECOCAMFORA

Topical skin cream with Camphor, Methyl Salicylate and Urea for treatment of wounds and small skin injuries

- Clinically proven effect
- Multipurpose: effective in cases of udder edema, mastitis and swelling
- Softens and protects skin from unfavorable environmental conditions

HEXIDINE SPRAY

A general-purpose antiseptic spray for the care and cleansing of damaged skin

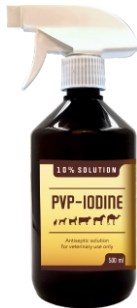

- Contains 2% Chlorhexidine digluconate
- Cleanses and disinfects the skin
- Has mycostatic properties
- Intended for all animals

POVIDONE IODINE 5% SOLUTION

A topical antiseptic sprayable solution for the treatment and prevention of wound and skin infections caused by bacteria and fungi

- Povidone iodine 5% solution is used as a topical antiseptic to help prevent infections
- Highly-effective topical preparation
- Used for the disinfection of damaged skin and prevention of skin infection
- Kills susceptible bacteria, fungi, protozoa, yeast and viruses
- Film forming, virtually non irritating formula
- For horses, camels, cattle, dogs and cats.

POVIDONE IODINE 10% SOLUTION

A topical antiseptic sprayable solution for the treatment and prevention of wound and skin infections caused by bacteria and fungi

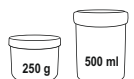

- Highly effective topical preparation
- Used for the disinfection of damaged skin and the prevention of skin infection
- Kills susceptible bacteria, fungi, protozoa, yeast and viruses
- No acquired bacterial and many microorganisms resistance for PVP-iodine
- Does not delay wound healing or granulation
- Is well tolerated when applied to the skin and wound
- Delineates the treated area with a characteristic colour

POVIDONE IODINE 10% GEL

A topical antiseptic gel for the treatment and prevention of wound and skin infections caused by bacteria and fungi

- Has rapid and prolonged activity
- Forms an adherent film over wounds
- No acquired bacterial and many microorganisms resistance for PVP-iodine
- Does not delay wound healing or granulation
- Does not irritate wounds
- Delineates the treated area with a characteristic colour.

HORSE BALM (PFERDEBALSAM)

Traditional warming balm contains ingredients such as Chestnut, Arnica, Aloe vera, Marigold, Oat, Chamomile extracts, Camphor and Methyl salicylate.

The balm reduces the duration and intensity of muscle pain

- Causes a warming effect
- Improves joints movement
- Relaxes muscles
- Improves blood circulation
- Balanced composition

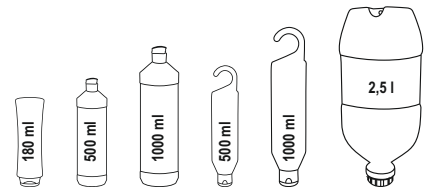

GREEN PLUS

Topical green liniment with balanced composition of Menthol, Eucalyptus and Camphor for edema, mastitis treatment

- Dual cooling and warming effect
- Effective in case of acute mastitis
- Pain soothing effect
- Multipurpose: recommended in cases of arthritis, bursitis, muscular, ligament and tendon strains and inflammations
- No preservatives

MENTHAMAX BLUE SPRAY

Topical sprayable blue emulsion with pure Japanese Peppermint, Eucalyptus, Tea Tree essential oils and Propolis for edema, mastitis treatment

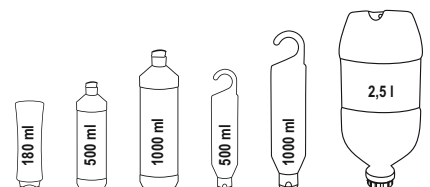

- Convenience of a spray with all the benefits of cream
- Less product waste, therefore, recommended for larger farms
- Rapid cooling and pain soothing effect
- Color indication to prevent follow-up applications
- Softens hard and swollen udder
- Effective in case of acute mastitis
- No preservatives

MENTHAMAX 36

Topical white emulgel with 36% of pure Japanese Peppermint oil for edema, mastitis treatment

- Best pain soothing, anesthetic effect because of large amount of active ingredient
- Time-proven formula
- Effective in case of acute mastitis
- Rapid cooling, then warming effect
- Softens hard and swollen udder
- Excellent for different inflammations treatment
- No preservatives

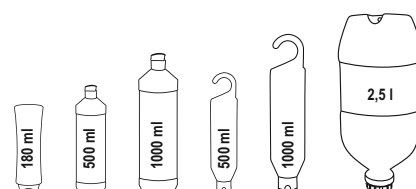

MSM liniment

A dual action MSM liniment with Methylsulfonylmethane (MSM), Menthol, Camphor, Eucalyptus, Peppermint for udder edema and mastitis treatment

- Effective measure in case of mastitis and udder edema
- Provides initial cooling effect followed by a warming effect
- Reduces edema in udder tissue
- Relieves chronic pain and inflammation
- Improves blood circulation in the damaged tissues

ARNIGEL

Topical transparent brown gel with Arnica extract, Mint and Eucalyptus essential oils, Menthol and Camphor for edema, mastitis treatment

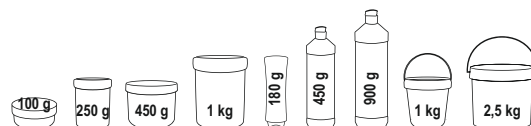

- Accelerates regeneration of tissues, releases and reduces spasms
- Cooling, pain soothing effect and rapid penetration
- Used in cases of bruises and traumas
- Multipurpose: effective for active animals before and after physical activity
- Natural ingredients, no artificial colors and preservatives

ECOMINT

Topical blue cream with balanced composition of Japanese Peppermint and Eucalyptus essential oils and Methyl Salicylate for edema, mastitis treatment

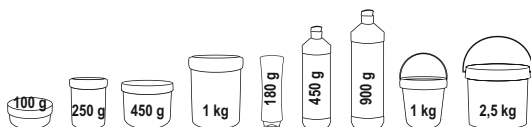

- Recommended in cases of intense inflammation and mastitis
- Softens skin and protects udder from unfavorable environmental conditions
- Provides cooling and pain soothing effect
- Stimulates regeneration of tissues

ECOCAMFORA

Topical white cream with Camphor, Methyl Salicylate and Urea for edema, mastitis treatment

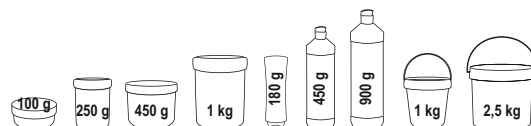

- Clinically proven effects to injured skin, mastitis and swellings
- Multipurpose: excellent for wound treatment and healing of small skin injuries
- Softens skin
- Protects udder from unfavorable environmental conditions

ECOPINE

Topical green cream with Pine essential oil, Methyl Salicylate and Urea for edema, mastitis treatment

- Provides antimicrobial effect
- Moisturizes and disinfects skin
- Multipurpose: effective in cases of rheumatic pain and joint inflammations
- Protects udder from unfavorable environmental conditions

VASENOL

Topical white cream for daily udder care with Glycerol and Urea

- For good everyday care of udder and teats skin
- Provides moistening and softening effect
- May be used in case of skin injuries
- Additional effect - protection of hands
- Protection from unfavorable weather conditions

CALENDULA & PROPOLIS ointment with vitamin E

Topical ointment with Calendula extract, Propolis and Vitamin E. Is designed to look after very dry, chapped, scaly skin ravaged by rough weather

- For effective everyday protection
- Softens the skin, protects it from cold and harmful environmental effects
- Has a regenerating effect
- Creates a protective film
- With natural ingredients

FITOMAST

Natural product for the treatment of mastitis and udder edema.

The effect of the cream originates from its ingredients: herbal extracts and essential oils - Ozonated olive oil, essential oils of Tea tree and Eucalyptus, Propolis and Calendula extract

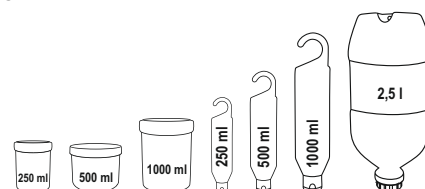

- Promotes immunostimulation, reduces edema of udder tissue
- Has anti-inflammatory and antibacterial qualities
- Soothes and softens the skin and is easily absorbed into tissues
- Normalizes milk production
- No antibiotics residue
- No withdrawal period

PROFIMAST

The product without analogues with combination of propolis, ozonated olive oil, eucalyptus, tea tree essential oils and calendula extract, enriched with shea butter and vitamin E. Used in the initial stages of inflammation of the udder or other soft tissues or in cases of edema of the udder after calving.

- Promotes local immunity
- Reduces edema in udder tissue
- Has anti-inflammatory and antibacterial properties
- Has a soothing and emollient effect
- Helps to return to normal milk production
- Absorbs well into tissues

ICHTHYOL - CAMPHOR ointment

Topical dark brown ointment with 15% Ichthammol and 10% Camphor, Lanolin and Salicylic Acid for edema, mastitis treatment

- Effective in case of mastitis and udder edema
- Provides anti-inflammatory, pain soothing and anesthetic effect
- Stimulates tissue regeneration
- Multipurpose: good in cases of abscesses, phlegmons, purulent inflammations and other dermal diseases

MASTIHELP

• Camphor • Methyl salicylate • Poplar oil • Marigold extract

A gel destined to use in case of udder or other soft tissue inflammation (i.e. udder edema after calving). Recommended if necessary to relieve chronic muscle, neuralgic, and post-traumatic pain or contusions, as well as muscle spasms, joint inflammations and tendon strains.

- Effective measure against chronic and acute pain
- Reduces udder edema
- Relieves chronic pain and inflammation

NEEM PLUS

Topical green ointment with balanced composition of Neem, Clove and Pine essential oils, Lactic acid, Methyl Salicylate and Camphor for udder protection

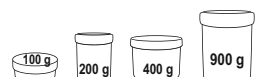

- Provides barrier for cuts, grazes, bruises, chapped teats and skin abrasions
- Contains Neem oil which acts as a fly repellent
- Protects udder from unfavorable environmental conditions
- Excellent in cases of small wounds and skin injuries

ICHTHYOL 20% PLUS ointment

Topical dark brown ointment with 20% Ichthammol, Lanolin and Salicylic acid for edema, mastitis treatment

- Effective in case of acute mastitis
- Reduces itching and stimulates regeneration
- Multipurpose: best in cases of abscesses, phlegmons, purulent inflammations and other dermal diseases
- Also recommended to use in cases of damaged nails and epidermis around nails

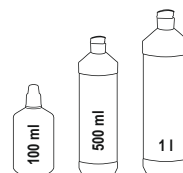

MASTEST

Diagnostic solution with 3 % anion active surface material and indicator to determine hidden mastitis

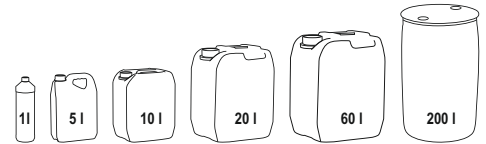

- Number of somatic cells is determined using economic, practical and reliable diagnostic CMT (California mastitis test) method
- Reaction is assessed in points
- Use of special plates is recommended
- Milk pH could also be assessed by this method

PROFIDIP WITH CHLORHEXIDINE

Chlorhexidine digluconate (5000 ppm) based dip for post-milking hygiene with Horse chestnut, Aloe and Glycerol

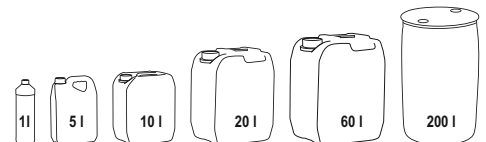

- Effective against a wide spectrum of microorganisms
- Does not irritate skin
- Forms a visible film (non-dripping), provides physical barrier against bacteria
- Mix of emollients for optimal conditioning and protection
- Effect lasts from one milking to the next
- No milk withdrawal
- EN 1656 successfully tested

PROFIDIP WITH LACTIC ACID

Lactic acid based dip for post-milking hygiene with Oats, Calendula extracts and Glycerol

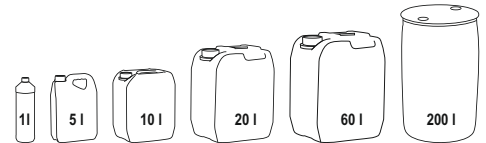

- Forms a visible film (non-dripping), provides physical barrier against bacteria
- Mix of emollients for optimal conditioning and protection
- Does not irritate skin
- No milk withdrawal
- EN 1656 successfully tested

PROFIDIP WITH IODINE

Iodine (1800, 2500 and 5000 ppm) based dip for post-milking hygiene with Chamomile extract and Glycerol

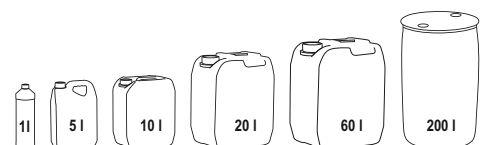

- Time-proven formula against wide spectrum of microorganisms
- Forms a visible film (non-dripping), provides physical barrier against bacteria
- Mix of emollients for optimal conditioning and protection
- Effect lasts from one milking to the next
- Does not irritate skin
- No milk withdrawal
- EN 1656 successfully tested

PROFIDIP CONC. WITH IODINE

A concentrated solution for teat care and hygiene after milking

- An economical choice
- Universal application scheme (can be used as a spray or as a dip.)
- Concentration of working solution (1500, 1875, 2500 ppm)
- Helps to prevent mastitis and reduces the number of somatic cells if used regularly
- Forms a clearly visible microfilm
- Retains moisture and elasticity of teat skin
- Suitable for hygiene of ulcerated teats
- Does not irritate skin
- No milk withdrawal
- EN 1656 successfully tested

PROFIFOAM WITH PERACETIC ACID

Peracetic acid and Hydrogen peroxide based foaming dip for pre-milking hygiene with Calendula, Glycerol and Lanolin

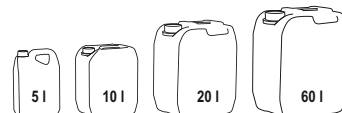

- Ensures perfect udder cleaning before milking
- Prevention of microorganisms transmission
- Mix of emollients for optimal conditioning and protection
- Does not irritate skin
- No milk withdrawal

PROFIFOAM CONCENTRATE WITH LACTIC ACID

Lactic acid and Hydrogen peroxide based foaming dip concentrate for pre-milking hygiene with Glycerol, Calendula and Aloe extracts

- Ensures perfect udder cleaning before milking
- Prevention of microorganisms transmission
- Adjustable effectiveness by concentrate level
- Can be applied by spraying, with a foam dipping cup or towels
- Does not irritate skin
- No milk withdrawal

PROFIFOAM WITH IODINE

(1, 400 ppm)

A ready-to-use foaming agent designed for cleansing udder and teats before milking

- Non-allergizing formula does not irritate the animal's udder and hands
- Effectiveness against a broad range of microorganisms
- Foams excellently, forms stable foam which ensures impeccable cleansing of teats before milking
- Twice as effective care of teat skin due to flavonoids contained in pot marigold extract
- Effective care and moisturisation of teats skin

ACTIVE INGREDIENTS

Ingredient name	Positive effect	Unfavorable effect
CHLORHEXIDINE	High efficiency, no skin irritation and drying effect	Not effective in case of viruses and pseudomonas
IODINE	Efficient and traditionally used all over the world. Commonly used during winter.	Allergies may occur, skin irritation or drying effect may be caused in case of high ppm concentration. May have adverse interaction with direct sunlight.
LACTIC ACID	No skin irritation, no residues, no adverse interactions	Limited effect against wide spectrum of microorganisms
PERACETIC ACID	Wide spectrum of efficiency, no residues, no adverse interactions. Low eco toxicity.	May irritate skin in case of high concentration
HYDROGEN PEROXIDE	Broad spectrum of efficacy, no residue	Can cause skin irritation

BIOPET TEAR STAIN REMOVER (AROUND EYES CLEANER)
